

THE ADHESIVE SOLUTIONS COMPANY.

Adhesive Applications

Adhesive Applications is a leading manufacturer of pressure-sensitive foam and film tapes. Formed by the unification of Stik-2 Products and Dielectric Polymers, we are the trusted single source for all your mounting, splicing, powder coating, bonding, gasketing and sealing needs. Adhesive Applications is a ISO 9001 registered company, assuring quality and efficiency. From Aerospace to Windows, or nearly any conceivable application, we take great pride in specialized high-quality products backed by an industry-leading commitment to customer satisfaction. With over 50 years of experience, we are experts in creating innovative solutions for specific applications. Our products include:

FOAM TAPE

Polyethylene, acrylic, PVC and urethane foam tapes.

TAPE

Unsupported transfer adhesives, double coated (film & non-woven supported) and single sided tapes.

ADHESIVE OPTIONS

Solvent, hot melt and water-based acrylic, rubber and silicone adhesives.

COATING OPTIONS

Adhesive coating on one or two sides. Permanent, removable or differential and zone coating in customized widths.

RELEASE LINERS

Paper, poly-coated paper, polyester, and poly films.

CONFIGURATIONS

Rolls, spools, logs, sheets, die cut, extended liner and custom shapes.

CUSTOM SERVICES

Coating and converting services customized to your requirements.

Solving Problems

Meeting specialized needs is what we do best. Just tell us the specifics of your application and we will work with you to find the best custom solution through these easy steps:

1. Comprehensive review of your adhesive application.
2. Laboratory samples prepared to your specifications.
3. Trial run scheduled on a production coater.
4. Adhesive feasibility study at your facility.
5. Final specifications, production coating with volume and timing determined.

Innovation at the Speed of Business

In product innovation, our strengths lie in our technical expertise and our ability to get things done quickly. We have developed specialized adhesive products for a variety of markets including aerospace, appliance, automotive, construction, electronics, fenestration, graphic arts, HVAC, industrial, medical, POP/retail, solar, bath/shower and transportation. Our proficiency in these applications, coupled with our coating and converting capabilities, has led to broad success in custom product development for some of the world's leading brands.

Some design factors we have addressed include:

Bonding Substrates	Conductivity
Adhesion	Liners
Color	Material Thickness
Product Configuration	Outgassing
Tensile	Process
Shear	Temperature
Operating Environment	Printability
Opacity	Adhesive Removal

When you need an innovative solution to meet special bonding requirements and you need it fast, we're ready. Whether it's varying one of our standard products or building an entirely new one to your specifications, we're a proven industry partner who will work with you each step of the way.

FAST SAMPLES

Lab samples shipped immediately.

LOW MINIMUM ORDERS

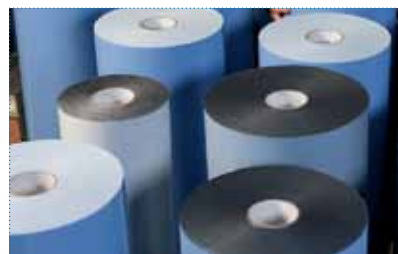

Discuss with your Sales Representative.

PRODUCT ADAPTATIONS

Adhesives, backings, colors, thickness, liners – just to name a few.

PROPRIETARY PRODUCT DEVELOPMENT

Solving unique problems with unique solutions.
